Tug Coasting,
9,11

The screw shaft of this coasting tug became due for examination in September last, and in reply to enquiry the Buenos Aires Surveyors state they are informed by the Owners that they have no further interest in maintaining the class in the Society's Register Book.

It may be added that it is the practice of these Owners to discontinue the classification of their coasting vessels.

The case received the consideration of the Classing Committee on the 23rd ultimo, when it was decided to withdraw the vessel's class from the Register Book and to insert three dots (...) in lieu thereof, indicating withdrawal of class at Owners' request.
