Lloyd's Register of Shipping,

71, Fenchurch Street, E.C. 3.

6th September, 1932.

Dear Sirs,

E.

I am in receipt of your letter of the 5th instant respecting the starting air receiver proposed to be fitted in the m.v. "LIZZIE & ANNIE", and which does not comply with the requirements of the Society's Rules.

I have to point out that Section 6, Clause 3 of the Rules for Heavy Oil Engines requires that in the case of welded air receivers, the welding is to be lap-welding; neither oxy-acetylene nor electric welding will be permitted, and, in the circumstances, I wired you today, as below, intimating that the air receiver in question cannot be accepted and should not be used.

I am, Dear Sirs,

Yours faithfully,

The Surveyors,

Secretary.

HULL.

Wire.

"Lizzie Annie as welding of seams by autogenous process not permitted by Rules air receiver referred to your letter yesterday cannot be accepted and should not be used".
