

30 MAY 1935

"LIZZIE & ANNIE"

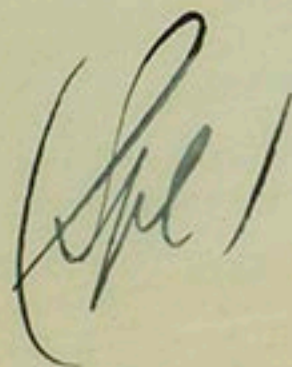

Hul. 45785.

The Special Survey No. 3 due 4,33 has been completed on the hull and to complete the survey in engines partly held 6,34, the bilge pump, clutch and reverse gear, thrust and intermediate shafts and two small air receivers require to be examined.

The Hull Surveyors state that this vessel trades weekly from Hull, and that the small items remaining, will be completed as soon as can be arranged in the immediate future. It may be pointed out that these engines were new in 1932.

The case is submitted for the favourable consideration of the Committee.
