The condition of any of the following items is to be described as "good" only when the part has been examined, found or placed in good condition, and is considered to be acceptable until the due date of the next Periodical Examination. Where it is considered that re-examination or repairs should be effected before the due date of the next Periodical Examination a distinguishing mark thus † should be inserted against the item and the circumstances and action recommended described fully under "defects and repairs". At part or complete Special Surveys those items which are not applicable to the ship should be cancelled with a black line; this need not be done when the machinery is on a continuous survey basis. When any part has been subjected to pressure test this should be stated. Engine parts when referred to by numbers should be counted from forward.

DOCKING Propellers Good. Wear Down of Stern Bushes .030" Oil Glands Good. Sea Connections. Fastenings Good. Has Screwshaft Tubeshaft been drawn? Yes. † Date of Examination 28/10/59. Has Shaft been changed? No. Has Shaft now fitted been previously used? Has Shaft now examined/RECEIVED continuous liner? No. Approved oil gland? Yes.

OPINION OF MACHINERY AND RECOMMENDATIONS

The Machinery of this vessel is eligible in our opinion to remain as classed without fresh record of TSOG subject to the screwshaft in way of Oil gland being specially examined by the end of September, 1960 and that the Special Survey now due, may be postponed until September, 1960.

NOW DONE FOR GENERAL EXAMINATION. (See Secretary's letter dated 29/10/59).

Machinery installation generally examined, pumping arrangements tried, electrical installation examined and tested and main engine tried under working conditions. All found satisfactory.

+ Screwshaft found slightly corroded in way of oil gland and whilst considered efficient meantime it is recommended that it be specially examined by the end of September, 1960.
