

BOARD REPORT on the "Lizzie & Annie" (Barge for being towed)

Hull report 16778. Machinery removed and vessel classed "Barge for being towed"

It is submitted the Owners should be informed that in consequence of the alteration of this vessel from a steamer to a "Barge for being towed" the freeboard certificate issued on the 16<sup>th</sup> July 1904 has ceased to have effect and should be returned to this office for cancellation.

If the Owners desire a new freeboard certificate for the vessel as altered the usual application form should be forwarded, and amended freeboards will then be assigned in accordance with the Freeboard Tables and regulations.

A copy of letter to Owners should be sent to the Hull Surveyors and they should be informed that attention should have been drawn to this case when the alterations were being effected in order that the freeboard might have been dealt with while the vessel was under survey.
