

Steel Bk. "PAMIR".  
-----

It is submitted the Hamburg Surveyors should be informed in reply to their letter of the 24th instant, that the Genoa Surveyors have been communicated with and in their opinion the examination of the bottom made by them when the vessel was in dry dock at their port may be taken as part of the Special Survey No.3 for reclassification.

It will therefore not be necessary for the vessel again to be placed in dry dock for this purpose.

Photoprints of the midship section and profile plans should be forwarded to the Hamburg Surveyors for their information, together with the plan of masts, spars and sails, as desired.
