

Barque "PARMA".

It is submitted that in the special circumstances the Society's Surveyors at Hamburg might be authorized to make an examination of the vessel and furnish a report on her general condition, provided the consent of the Owners is first obtained.

At the same time the Surveyors should be informed that for the examination of the masts, &c., they should employ the services of an expert rigger, who should carefully examine the masts ~~and~~ ^{rigging} spars, and, where practicable, the sails also.
