Monday.

THE SECRETARY,

Messrs. LLOYDS REGISTRY,

71 Fenchurch Street,

LONDON. E.C.

Dear Sir,

S.S. No. 735.

We are obliged for your prompt letter of the 16th inst., relating to this Vessel.

We beg to return the approved plan of the cast steel stem piece of which we have taken note.

With further reference to the amended arrangement of tank margin plate, considering that you wish the angles connecting the tankside knee and tank top to be doubled, and as most of the strain will fall upon these bars, we consider that double bars to the margin plate will then be unnecessary, therefore we propose to make these bars single and fit the double bars which you have added and which we consider to be an improvement. We should be glad if you would agree to this modification, it being understood that the rivets are close pitched in all these bars, viz: $\frac{7}{8}$ " rivets, $4\frac{1}{2}$ " pitch.

Referring to your second letter of the 16th inst., we have put the complete deck plans in hand showing proposed
