LONDON. E.C.

Dear Sir,

CUNARD EXPRESS STEAMER No. 735.

We are obliged for your letter of the 27th inst., covering the 9 plans forwarded in our letter of the 8th inst., also ^{approved} copy of plan of forward bulkhead stiffening all of which have our attention.

We regret that we are unable to send you the curve of ~~maximum~~ bending moment as the Engineers are making a modification in their engine arrangement which will affect the curve. We will send it to you as soon as possible so that you may consider the matter of the employment of high tensile steel so far as it affects the topside plating and decks.

Yours faithfully,

For
