

COPY.

PRIVATE & CONFIDENTIAL.

30th January, 1906.

Gentlemen,

M.

I duly received Mr. Morton's letter of the 27th instant, respecting the Hall's patent stockless anchors proposed to be made by Messrs. W. Hingley & Sons, Lim. for the Cunard Express Steamers now building by Messrs. J. Brown & Co., Lim., and Messrs. Swan, Hunter & Wigham Richardson, Lim., and in reply to his enquiry I am directed to state that if nickel steel material is used in the manufacture of these anchors, the tests should be as set forth in Circular 647 of the Rules for ordinary cast steel anchors.

I am, Gentlemen,

Your obedient servant,

Secretary.

The Surveyors,

SHEFFIELD.
