

Swansea

1st September 1891.

John W Dimmock

The Owner proceed on board the iron screw steamer "Mineral" 5119 tons, of Sunderland, on the 24th day of August 1891, and at other dates, for the purpose of examining and ascertaining the extent of damage sustained by the vessel on 13th day of June, on the 18th day of July, and on other days, said to be caused by stress of weather &c. for particulars of which see Log book and Protest.

Found both rails in way of ash shoots amidsthips carried away, and steering gear rods broken.

Windlass damaged and out of order.

Port bower anchor and thirty fathoms of stud chain cable missing.

Starboard bower anchor damaged, shank bent and broken through the

Surveyor of Ships or the Dry Dock, No. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100

trend,

One 5th Port
 One 5th manilla warp broken, and
 3" wire hawser damaged.

Recommended the rolls in
 way of oak sheels be renewed and
 oak sheels refilled. Steer's gear to
 be overhauled and rods repaired.
 Windlass to be turned out, opened
 up and overhauled, also repaired
 as required. Supplied weight 55 5/8

One new lower anchor and thirty
 fathoms of chain cable to be supplied
 and placed on port bow. Also one
 new lower anchor to be placed on
 Starboard bow.

One new 13' coir towline and two
 1 1/2" steel wire warps have been supplied
 and placed on the 5th wire
 and 3rd wire

All fittings on gear removed in
 order to complete the above work
 and to provide a more good order that
 the gear may be placed in the same
 condition as before the accident
 in question occurred.
 The above recommendation made by
 me have been complied with.

J. W. Conner
