

Composite Barge "Cutty Sark" 921 Tons.  
(N. 1518 in the Register Book) built at  
Dumbarton in 1869-11 mo. and classed 16A1. "C.F."

This vessel has now been submitted to  
Special Survey, and is recommended to be  
raised, under Amended Rules for metal fastenings, and  
Amended Table I, to the 19A1 class. "C.F."

The whole of the timber materials in the  
construction of this vessel are raised by the  
Amended Table I, to the 16 years grade; and  
the whole of the external fastenings from the lower  
part of the keel to the height of the main deck are of  
yellow metal

Under these circumstances, and in view of the  
favorable report on her condition, it is submitted  
this vessel appears to merit the favorable consideration  
of the Committee to be raised, as recommended to the  
19A1 class, namely.

16 years under Amended Table I,

and 3 years for metal fastenings, instead of 2 years as  
at present assigned.

"C.F." 19A1

Wm J.H.

19/5/80

It is submitted that as this vessel appears  
from the report to be fastened to the gunwale with  
yellow metal, and iron riveted plates above  
this, to mark galvanized iron bolts above upper  
deck would be inapplicable
