

T.S.S. "ARANDORA STAR"

IT IS SUBMITTED that the diagrammatic plan and specification of sewage ejector installation for the amidship accommodation of the above vessel merit approval, provided the arrangements be as shown on the plan and as detailed in the specification, and the whole of the work be carried out to the satisfaction of the Surveyor.

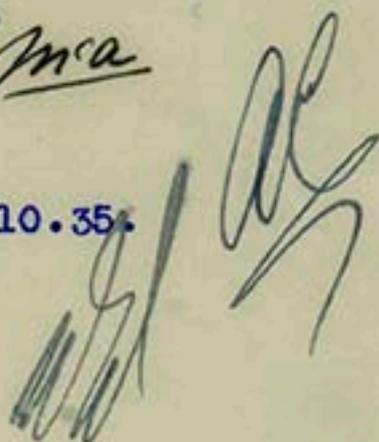

It is noted from the Firm's letter that the locally-operated sluice valves to the sewer mains, where they pass through the aft engine room bulkhead, will not be controlled from above the bulkhead deck, and no exception will be taken to this arrangement.

Mr. Watt
