

Lloyd's Register of Shipping,

ENCLOSURE.

Via Mazzini No. 9,

Trieste (III), 17th February 1933.

Casella postale No. 2.

Dear Mr. Carey,

S.S. "CONTE DI SAVOIA".

It is noted that on the first entry certificate dated 23rd December 1932, also in Supplement No.15 to the Register Book, the Main Boiler pressure is indicated at 450 lbs. per sq.inch.

I enclose herewith a copy of the Secretary's letter E dated 28th October 1932, from the last paragraph of which it will be noted that the working pressure to be recorded in the Register Book will be 30 kgs. per sq.cm., which is equivalent to 425 lbs. per sq. inch.

Attention to this fact was drawn in Trieste first entry machinery Report No.9806.

I shall be glad to be informed in due course if it is desired that the machinery certificate should be obtained from the Owners and returned to you for modification.

With kind regards,

Yours faithfully,

E. Carey Esq.,
LONDON.
