

# REPORT ON MACHINERY.

21562

deficiencies? *Yes*

No. *21562* Port of *Newcastle* Received at London Office *THU 14 JUN 1888*  
 No. in Survey held at *Newcastle* Date, first Survey *25 Jan'y* Last Survey *9<sup>th</sup> June 1888*  
 Reg. Book. on the *S.S. Gellivara* (Number of Visits *19*) Tons  
 Master *Shompson* Built at *Newcastle* By whom built *C. S. Swan & Hunter* When built *1888*  
 Engines made at *Newcastle* By whom made *Walkers Shipway Coy Ltd* when made *1888*  
 Boilers made at *"* By whom made *"* when made *1888*  
 Registered Horse Power *300* Owners *Anglo Scandinavian Steam Ship Co Ltd* Port belonging to *London*

If of Iron or Steel give Scantlings, mode of riveting, quality of Materials  
*all in one*  
*108 5/8 x 25 1/4*  
*1/2 x 9/32 at head*  
*better 13 March 1888*

Weight req'd per Rule.	Machine where Tested, Superintendent, also Number of Certificates.

**ENGINES, &c.**  
 Description of Engines *Two screw - Triple expansion on three cranks*  
 Diameter of Cylinders *18. 28 1/2. 46* Length of Stroke *33* No. of Rev. per minute *110* Point of Cut off, High Pressure *24"* Low Pressure *25 1/4"*  
 Diameter of Screw shaft *9* Diam. of Tunnel shaft *8 1/2* Diam. of Crank shaft journals *9* Diam. of Crank pin *9* size of Crank webs *5 1/2 x 10 3/4*  
 Diameter of screw *12-0* Pitch of screw *12.6 at 4 1/4 6 at 1/2* No. of blades *4* state whether moreable *Y* total surface *40 sq in each*  
 No. of Feed pumps *1* diameter of ditto *3 3/4* Stroke *18"* Can one be overhauled while the other is at work *Y*  
 No. of Bilge pumps *1* diameter of ditto *4 1/2* Stroke *18"* Can one be overhauled while the other is at work *Y*  
 Where do they pump from *Both from engine helpe (3) holds, tunnel, wing tank, suction*  
 No. of Donkey Engines *Two* Size of Pumps *Ballast 10 x 10 x 10 x 10* Where do they pump from *Ballast from all tank*  
*suction, holds, helpe tunnel, Feed from sea & hotwell*  
 Are all the bilge suction pipes fitted with roses *Y* Are the roses always accessible *Y* Are the sluices on Engine room bulkheads always accessible *Y*  
 No. of bilge injections *2* and sizes *4* Are they connected to condenser or to circulating pump *Y*  
 How are the pumps worked *by levers over Condenser from wind engine*  
 Are all connections with the sea direct on the skin of the ship *Y* Are they Valves or Cocks *both*  
 Are they fixed sufficiently high on the ship's side to be seen without lifting the stokehold plates *Y* Are the discharge pipes above or below the deep water line *above*  
 Are they each fitted with a discharge valve always accessible on the plating of the vessel *Y* Are the blow off cocks fitted with a spigot and brass covering plate *Y*  
 What pipes are carried through the bunkers *none* How are they protected *Y*  
 Are all pipes, cocks, valves, and pumps in connection with the machinery accessible at all times *Y*  
 Are the pipes, cocks, and valves arranged so as to prevent an unintentional connection between the sea and the bilges *Y*  
 When were stern tube, propeller, screw shaft, and all connections examined in dry dock *new vessel*  
 Is the screw shaft tunnel watertight *Y* and fitted with a sluice door *Y* worked from *top platform*  
*common to both tunnels*

**OILERS, &c.**  
 Number of Boilers *Two* Description *Cyl. double ended* Whether Steel or Iron *Steel*  
 Working Pressure *160 lbs* Tested by hydraulic pressure to *320 lbs* Date of test *April 20 1888 No 2469*  
 Description of superheating apparatus or steam chest *none*  
 Can each boiler be worked separately *Y* Can the superheater be shut off and the boiler worked separately *Y*  
 No. of square feet of fire grate surface in each boiler *92 sq* Description of safety valves *spring* No. to each boiler *two*  
 Area of each valve *11 sq* Are they fitted with easing gear *Y* No. of safety valves to superheater *Y* area of each valve *Y*  
 Are they fitted with easing gear *Y* Smallest distance between boilers and bunkers or woodwork *9* Diameter of boilers *12.9*  
 Length of boilers *16.5* description of riveting of shell long. seams *double butt tubed* Circum. seams *double thick lap* Thickness of shell plates *1 1/8*  
 Diameter of rivet holes *1 1/8* whether punched or drilled *drilled* pitch of rivets *4 1/2* Lap of plating *16 1/2*  
 Per centage of strength of longitudinal joint *85-* working pressure of shell by rules *161* size of manholes in shell *16 x 12*  
 Size of compensating rings *6 x 1 1/8* No. of Furnaces in each boiler *Two*  
 Outside diameter *36* length, top *70* bottom *flues* thickness of plates *1/2* description of joint *Y* if rings are fitted *Y*  
 Greatest length between rings *Y* working pressure of furnace by the rules *166* combustion chamber plating, thickness, sides *5/8* back *Y* top *5/8*  
 Pitch of stays to ditto, sides *8 3/8* back *Y* top *8 7/8* If stays are fitted with nuts or riveted heads *nut* working pressure of plating by rules *161* Diameter of stays at smallest part *1 3/8* working pressure of ditto by rules *159* end plates in steam space, thickness *1 7/16*  
 Pitch of stays to ditto *14* how stays are secured *As per* working pressure by rules *160* diameter of stays at smallest part *2 1/4* working pressure by rules *183* Front plates at bottom, thickness *1 3/16* Back plates, thickness *Y*  
 Greatest pitch of stays *Y* working pressure by rules *Y* Diameter of tubes *3 1/8* pitch of tubes *4 1/2* thickness of tube plates, front *1 5/16* back *1 3/16* how stayed *tube* pitch of stays *9* width of water spaces *5 1/2*  
 Diameter of Superheater or Steam chest *Y* length *Y* thickness of plates *Y* description of longitudinal joint *Y* diam. of rivet holes *Y*  
 Pitch of rivets *Y* working pressure of shell by rules *Y* diameter of flue *Y* thickness of plates *Y* If stiffened with rings *Y*  
 Distance between rings *Y* working pressure by rules *Y* end plates of superheater, or steam chest; thickness *Y* how stayed *Y*  
 Superheater or steam chest; how connected to boiler *Y*

Report used 18/6/88 sent to Lm 18/6/88

**DONKEY BOILER**— Description *Cyl. multitubular*  
 Made at *Stockton* by whom made *Riley Bros* when made *9.5.88* where fixed *on deck*  
 Working pressure *150lb* tested by hydraulic pressure to *300* No. of Certificate *1874* fire grate area *22.5 sq* description of safety  
 valves *sprung* No. of safety valves *two* area of each *8.30* if fitted with easing gear *yes* if steam from main boilers can  
 enter the donkey boiler *no* diameter of donkey boiler *8.0* length *8.6* description of riveting *double butt straps*  
 Thickness of shell plates *23/32* diameter of rivet holes *15/16* whether punched or drilled *d* pitch of rivets *7 1/4* lap of plating *7 1/4*  
 per centage of strength of joint *85.3* thickness of ~~plates~~ *25/32* stayed by *brass straps 12 1/4 x 12 riv? washers*  
 Diameter of furnace, top *2.3* bottom *1* length of furnace *5.7* thickness of plates *17/32 & 3/16* description of joint *or 2 butt*  
 Thickness of furnace crown plates *1/2* stayed by *brass 6 3/4 pitch* working pressure of shell by rules *160*  
 Working pressure of furnace by rules *157* diameter of uptake *1* thickness of plates *1* thickness of water tubes *1*

**SPARE GEAR.** State the articles supplied:— *Three eccentric straps, 2 packing rings for piston*  
*valves, 3 crank shafts, propeller brass, 4 blades. 2 Slide valve rods 11 in. of top and*  
*and bottom end connecting rods. 2 sets corrugated valves for circulating pumps & 2 sets of corrugated*  
*valves for air pumps* *Lloyd's Spare Gear* - 18 Coupling bolts, 4 top  
 The foregoing is a correct description, *2 bottom & 4 main bearing bolts, 1/2 in. of top pump valve*  
 Manufacturer. *L. Rusden* *Thames* *burden, bolts nuts & ordinary engine room outfit.*

**General Remarks** (State quality of workmanship, opinions as to class, &c. *The machinery of this vessel has been*  
*been constructed under special survey, the materials and workmanship*  
*ship are sound and good and eligible in my opinion to be classed*  
*+ L. M. C. 6.88 in the Society's Register Book.*

It is submitted that this vessel is eligible to have the notification + 2m 6 6.88 recorded.
