

Received by Chief Ship Surveyor _____

Received from Chief Ship Surveyor _____

14 SEP 1942

VESSEL'S NAME _____

"EMERALD"

Rpt. Lon. _____

No. 110594

The remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

(The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement.—Extract from Sub-Committee's Report, 24/5/42.)

Nature of Survey _____

3rd. S.S. No. 3.

due 2,42

THICKNESSES OF PLATING ascertained by drilling, and comparison of same with the original thicknesses.

The thicknesses are in _____ of an inch.

Drillings at ends ~~made~~ made in the vicinity of the peak bulkheads.

The LONDON Surveyors report the vessel placed in dry dock, bottom coated and the conversion of the vessel from Special Government Service to Normal Service. Some structural alterations have been effected in accordance with the approved plans, attached. These alterations, however, do not affect the present records in the Register Book.

The 3rd S.S. No.3 due 2,42 has been held and repairs effected to shell and deck plating, bunkers, bulkheads, floors, rudder pintles etc, etc.

The shell plating has been drilled with results, as shown above, which appear satisfactory.

The fore and main masts have been renewed together with equipment of hawsers and warps. The mainmast has been stiffened in accordance with the Sea Transport requirements and additional preventer stays fitted.

The equipment is deficient by a bow anchor and it is recommended this be made good at the end of the present emergency.

It is submitted the vessel appears worthy to remain as classed and to have record of docking survey 7,42 and notation of 'S.S. 3rd No.3-7,42' (subject to a bower anchor being supplied).
