

REPORT OF SURVEY FOR REPAIRS, &c., OF ENGINES AND BOILERS

(Received at London Office)

20 AUG

Date of writing Report	17 th August 1942	When handed in at Local Office	20 August 1942	Port of London
No. in q. Book. 1050	Survey held at Tilbury & London		Date. First Survey	30 th Mar 1942
			Last Survey	6 th August 1942
			(No. of Visits)	22
Manager	Gross 736	Steel %	EMERALD	Year. Month.
Net 305				When 1904 - 8
nominal Power	99RHP	Vessel built at Port Glasgow	By whom A. Rodger 16°	When 1904.
of Main Boilers 1.5E		Engines made at Glasgow	By whom A. Rodger 16°	
of Donkey Boilers 1.5E		Boilers, when made (Main) 1904	(Donkey)	
Max Pressure 160 lbs		Owners Wm Robertson	Owners' Address (if not already recorded in Appendix to Register Book.) Port Glasgow Voyage	
Donkey Boilers 1.5E		Managers Tilbury Western Dry Docks		
1st Report No.	Port	Surveyed Afloat in Dry Dock King George V. Dock	Particulars of Classification (which must be inserted precisely as in Register Book & Supplements).	
particulars of Examination and Repairs (if any) L.M.C.			CHARACTER. For Special Survey Date of this Survey and of Periodical Surveys.	Machinery and Boiler Surveys (including date of N.B., if any).

Periodical Surveys, when held, must be reported in detail and serially in the terms of the Rules. State clearly the use of Repairs, if any, and, in detail, the nature and extent of Examinations and subsequent Repairs. Repairs on account of Damage (the cause of which must be stated) should be separated from Repairs due to other causes; and details being detailed in the body of the report, should be briefly summarised at the end of the report. State also the dates and initials of any letters respecting this case.

damage cases where the Surveyor has not made a special damage report he is required to state whether he offered his services for this purpose, and why they were declined.

Is a damage report made by anyone else? If so, by whom?

Does the Surveyor personally go inside Main Boiler and make a thorough examination at this time?

Continued.

values adjusted to 160 lbs/in."

Wear and Tear Repairs. HP cylinder removed for access to slide valve false face, lap bolts in false face overhauled and made good where necessary. LP eastern guide shoe found fractured across face, guide shoe now renewed; LP eastern guide found fractured across face, column removed, fracture machined out and false guide face secured to column. HP, MP, LP piston rods and valve spindles found slightly pitted now skimmed and rebrushed, crosshead pins cleaned up and braces adjusted. Thrust shaft collars and journals found pitted now skimmed and bearings remetalled. Air and circulating pump rods, feed and bilge rams found scored now skimmed and rebrushed. Main discharge pipe found generally thin now renewed. Main discharge and ballast pump overboard discharge valve chests removed, tested hydraulically and found efficient. A new screw shaft fitted with a C.L. (stamped Lloyd's No 8529 3.6.42 C.P) together with a new four bladed (c.i.) propeller now satisfactorily fitted in place. Spare propeller boss skimmed out to suit new screw shaft. Forging certificate attached.

On completion of repairs the main and auxiliary machinery were tried under steam and found satisfactory.

Electrical Installation. Dynamo and installation tested under full load conditions, for insulation resistance, and found satisfactory.

Propeller
Shaft repairs secured
Heat exchangers
Pump and condenser
repaired
