

Messrs. Barclay, Curle & Co's No. 472, S.S. "WARATAH"

Equipment Number 69319, letter of

The Glasgow Surveyors state that 300 fathoms of 2 9/16 chain cable have been supplied to this vessel weighing 990 cwts-2 qrs-17 lbs, or 1 cwt-2 qrs-17 lbs in excess of the weight required by Table 22. They however state that 150 fathoms of the cable weighing 492 cwts-0 qrs-14 lbs, or 2 cwts-1 qr-14 lbs (four-tenths of 1%) less than required.

It is submitted that in view of the ^{one-half of the cable,} deficiency in weight of as pointed out by the Surveyors, being so slight, and of the total weight of the cable being so much in excess of the Rule requirements, the cable might be approved for the figure 1.
