Reference

E.

Dear Sir,

We are in receipt of your telegram and letter of confirmation of the 31st ultimo regarding the Loeffler Boiler Installation on the steamer "CONTE ROSSO".

We have been today in communication with Messrs. Cantieri Riuniti dell'Adriatico, who state that the conference will have chiefly the object of determining the modalities of the tests for ascertaining the creep limits of the materials used in the construction of the boiler and those in connexion with welding and welders.

The three classification Societies concerned in this case are Lloyd's Register of Shipping, Registro Italiano and British Corporation and, as the respective Regulations with regard to the above tests may to a certain extent vary, Messrs. Witkowitz are anxious for a conference to be held in order to determine a procedure which will be acceptable to all parties concerned.

Messrs. Cantieri Riuniti dell'Adriatico further state that the delegates will be given the opportunity of referring any doubtful points arising from the discussion to the respective Committees.

Messrs. Registro Italiano inform us that it is highly probable that Ing. F. Gandusio, the Senior Engineer Surveyor at Trieste, will be delegated to represent their Society and the British Corporation at this conference.

I am, Dear Sir,

Yours faithfully,

For the Surveyors.

The Secretary,
LONDON.
