# Lloyd's Register of Shipping,

71, Fenchurch Street. E.C. 3.

20th June, 1935.

Dear Sirs,

S.S. "CONTE ROSSO".  
Loeffler Boiler installation.

E. With reference to your letters of the 7th and 15th instant, relative to the above, I have to acquaint you the plans of this Loeffler Boiler installation are being examined, but it is noted on certain of them that reference is made to the "Dauerstands Festigkeit" which it is believed is the Limiting Creep Stress.

The Limiting Creep Stress is defined in different ways by different Authorities, and as the figures given on the plan form molybdenum steel do not correspond to anything that is available in this Office, I shall be glad if you will ascertain from the Makers the precise composition of the steel proposed for these purposes and at the same time define the creep limit as used by them.

I am, Dear Sirs,

Yours faithfully,

Secretary.

The Surveyors,

TREESTE.
