Lloyd's Register of Shipping.

Port of STETTIN,

22nd February, 1936.

This is to Certify that

--N. Stolte--

the undersigned Surveyor to this Society did at the request of Messrs. Siemens-Schuckertwerke A.G. examine on the 20th February, 1936, at their works in Berlin, one cast steel water-regulating valve of 60 mm. diameter in finished condition, order Witkowitz for s.s. "CONTROSSO", and found the same, so far as can be seen, in compliance with the works' plan.

The valve has been tested to 240 kgs. per sqcm. water pressure and was found tight and sound at that pressure.

It is stated by the makers that the cast steel valve casing was made at the works of Messrs. Welland & Tuxhorn G.m.b.H., Brackwede, and that material tests had not been carried out.

The valve was marked: Lloyd's Test 240 Atm.

NS 20.2.36.

N. Stolte

Surveyor to Lloyd's Register.

This Certificate is issued upon the terms of the Rules and Regulations of the Society, which provide that:—

“While the Committees of the Society use their best endeavours to ensure that the functions of the Society are properly executed, it is to be understood that neither the Society nor any Member of any of its Committees is under any circumstances whatever to be held responsible for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any error of judgment, default or negligence of any of its Committees or any Member thereof, or the Surveyors, or other Officers or Agents of the Society.”
