*Litkovic Nimes, Works etc.* Engine No.

LOEFLER BOILER & ESCHER WYSS TURBINE INSTALLATION

It is submitted that the plan of <sup>amended</sup> intermediate superheater  
and plan showing details of branches <sup>(has 2329/H and 2545/H)</sup> merit approval  
for a working pressure of  $14 \text{ Kg/cm}^2$  on the shell, and  $14.60 \text{ Kg/cm}^2$   
in the tubes provided the superheater be constructed under the usual  
conditions of survey and testing and the welding be carried  
out to the Surveyor's entire satisfaction.

It is noted that the branches will be made of cast steel.

The plan of intermediate superheater dealt with in Secretary's letter  
of 14th August 1935 to the Trieste Surveyor, a copy of which is in the  
hands of the Vienna Surveyor, should be cancelled.

Return 2 plans

Forward 2 plans to Vienna Surveyor, to whom a copy of the Fiume letter and  
Secretary's reply should be sent

Attn: Trieste Surveyor  
Return 2 plans.

Return plan.

Retain copy.
