

Lloyd's Register of Shipping,

5 Enclosures.

Via Mazzini No. 9,

Trieste (III), 30th November 1935

Casella postale No. 2.

Reference

Dear Sir,

"CONTE ROSSO".
Loeffler-Escher-Wyss HP Installation.

With reference to your letter of the 7th instant with enclosed memorandum regarding the above installation, we have received now from Messrs. Cantieri Riuniti dell'Adriatico, Fabbrica Macchine S. Andrea, copy of a letter addressed to them by Messrs. Witkowitz. We enclose a translation and a schematical drawing explaining the working of the water gauge shown on plan No. 2649/H. In the same letter is also explained the working of the sediment separator of the evaporator drum.

Messrs. Cantieri Riuniti dell'Adriatico inform us that this separator will be modified so as to have a mud door and that same is to be lengthened by $\frac{1}{3}$ of the present length.

We enclose 3 copies of pipe list containing some amendments regarding the quality of the materials to be employed.

Messrs. Cantieri Riuniti submit that the question of the pipes be reconsidered and request the favour of a telegraphic reply regarding their thickness considered from the point of view of Messrs. Witkowitz.

I am, Dear Sir,
Yours faithfully,

The Secretary,
LONDON.
