

s.s. "CONTE ROSSO".

Loeffler Boiler and Escher Wyss Turbine Installation.

IT IS SUBMITTED the Trieste Surveyors be informed the remarks contained in their letter of the 13th instant and the enclosed translation are noted.

They should advise the Firm that the matters discussed in the first three paragraphs of their letter are now in order.

With reference to the question of the feed pump turbine casings, the Surveyors should advise the Firm that the information requested in the Secretary's letter is awaited.

The plan showing details of the manoeuvring steam valve merits approval, provided the valve be constructed and fitted under the usual conditions of survey and testing, and is found to function satisfactorily under working conditions.

It is concluded that the material of the stud bolts described as M. St. m. h. is a special steel having similar properties to the Ni Cr Mo steel having a limiting creep stress of 22 Kg/mm^2 at 475°C as described in Secretary's letter of 20.9.35 to Messrs Witkovitz.
19.11.35.
