\*

Messrs. Schmidt's Superheating Co., Ltd of Manchester, attend at their Works on the 15<sup>th</sup>. August, 1919 and subsequently for the purpose of testing by hydraulic pressure twenty-four cast steel headers and elements for same intended for superheaters to the order of Messrs. William Beardmore & Co., Ltd. of Dalmuir, Glasgow for their No. 557 + 557.

The header castings were tested in accordance with the requirements of the Society's Rules.

The finished headers were tested in our presence by hydraulic pressure to 660 lbs. per square inch and 10 of the elements to 2400 lbs. per square inch with satisfactory results.

The headers are stamped :— LLOYD'S TEST 660 LBS. — with date of hydraulic test and with " " for identification.

See :- L 2-2-0.
