Enclosures

Dear Sirs,

With reference to your letters of the 28th ultimo and 4th instant regarding the equipment of the "HELLENIC PRINCE", I have to confirm the intimation given to Mr. Scully yesterday, that the equipment numeral for this ship, computed from the information available in this Office, is approximately 42025, letter "b⁺".

Accordingly the anchors proposed for this vessel can be approved provided satisfactory evidence exists of weights and tests, but the chain cable should be 2.6/16" diameter, or equivalent high tensile quality.

I have to add, however, that if difficulty is experienced in procuring chain of this diameter, it could be recommended to the Committee that the existing chain of 2.1/8" diameter be accepted as a temporary measure, but only for a very limited period.

The equipment of ropes should be in accordance with or equivalent to equipment letter "b⁺", Table 53 of the Rules.

The deferred reports, first entry and plans are returned herewith as requested.

under separate cover.

Yours faithfully,

Clerk to the Classification Committee.

The Surveyors,
BARRY.
