

"VIKING"

For "M" Dept.

The Sea Transport Department desire an increase of draught for the above vessel to 13' 10" all seasons moulded.

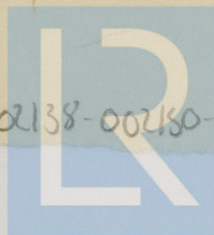

The equivalent moulded depth for a C.S.S. vessel with standard tween deck height, sheer and camber is 21' 3"

If the scantlings are not suitable for the above draught will the Surveyors please state for what draught they are suitable.

The service will not be worse than that of the Irish Channel.
