ENCLOSURE

High Close, Wokingham, Berks.

17th January 1944

Dear Sir,

I am advised by the Society's Glasgow Office that the steamer "LADY CONNAUGHT" is being fitted out as a Hospital ship and that it has been decided to raise the freeboard deck to the superstructure deck by filling in the forward and after wells and fitting hinged steel doors in the ships side in place of the present gangway doors.

Amended freeboards have accordingly been computed and I enclose a copy of the computation and shall be glad to learn what endorsement will be required on the Load Line Certificate.

I am, Dear Sir,  
Yours faithfully,

The Assistant Secretary,  
Ministry of War Transport,  
Berkeley Square House,  
Berkeley Square

pro Clerk to the  
Classification Committee.
