TELE
pipes to the bilges. If the bulkheads are
shelter deck, a scupper pipe fitted on each
in the machinery space, and at the forward
and the after end of the afterhold, will
can drain freely to these scupper pipes from
'tween decks. If it is desired to retain
or sanitary discharges from the steering ge
room and the refrigerating space, these sho
screw-down, automatic, non-return valves co
shelter deck.

You should satisfy yourselves with
arrangements, particularly the appliances
and other openings in the shelter deck.

Full particulars of the alteration
on Rpt.C11(Contd), and a copy placed on board
