

REPORT on the Stm. Trawler "Notre Dame de France"

is submitted the surveyors be informed that it is observed that the trim by stern of this vessel is 6 feet. They should state if this is a trim when loaded to the disc. They should state the distance of the centre of area of the load water plane abaft the middle of length of the vessel. If there are any sidelights below the upper deck they should state the height of the sill of the lowest of these above the top of the vessel's keel, & also its fore & aft position.
