

" FOZ DO DOURO "

---

Mr. C.E.P. Taylor telephoned this afternoon to enquire whether it was correct that this vessel had been fitted with oil engines.

I informed him of the contents of the letter, dated 21st December, from our Surveyors at Lisbon, and told him that we were awaiting the reports from our Philadelphia Office regarding the installation of the engines.

When these reports are received, Mr. Taylor wishes to be advised about the power of the engines, as he has been asked to insure the vessel for a voyage to Mexico.
