22nd July 1955

Statement of Chief Engineer of S/T. "Hatano"

At about 7 a.m. on Wednesday, 20th July 1955, whilst we were steaming to the fishing grounds, our engines suddenly stopped dead.

I took the cover off the L.P. <sup>VALVE CHEST</sup> ~~cylinder~~, removed the broken valve spindle and took the valve out.

We then had to return to Milford on two engines.

Signed:-

*H. G. Webster*

Chief Engineer.
