

"GRAMSBERGEN"

IT IS SUBMITTED that before this case receives consideration it should be pointed out to the Groningen Surveyors that as the request for survey of this vessel was made after the new Rules for Fire Extinguishing Arrangements came into force it will be necessary to apply these new Rules. The Surveyors should, therefore, arrange to fit a 45 litre extinguisher or equivalent in the machinery space and should confirm that the remaining requirements of Chapter F have been complied with.
