

**COPY.**  
**PORT OF SUNDERLAND.**

TO BE ATTACHED TO REPORT.  
-----

29th April 1924.

Dear Sirs,

I have to acquaint you that the new steamer "ASHTREE" Messrs. Craig, Taylor & Co's S.S. No. 210, has returned to your port for finishing and that to complete the machinery survey the shaft tunnel requires to be made watertight and the spare gear to be examined.

I may add in regard to the spare gear that the main engine bolts have been examined, the rest of the outfit is stated to have been placed on board shortly before the vessel left, but there was no opportunity for examination.

I am, Dear Sirs,

Yours faithfully,

*J. C. Davis*

P.S. The approved plan of Pumping Arrangements is returned herewith. *shd*

The Surveyors,  
MIDDLESBROUGH.
