S.S. "MIRANDELA" ex "Fernaõ Veloso" ex "Khalif"

No. 77454 in the R.B.

This vessel, built in 1906 by Messrs. Bremer Vulkan and classed with the Germanischer Lloyd, is undergoing survey at Lisbon with a view to classification with this Society.

The Surveyors at Lisbon have forwarded a plan of the boilers for consideration.

The scantlings of the boilers as shown on the plan meet the requirements of the Rules in force at the time the vessel was constructed for the original working pressure of 16 kgs. per sq. cm. *228 lb.*

It is submitted that provided the boilers be examined throughout, their scantlings be in accordance with the plan and the boilers be found in safe working condition, they might be accepted for the original working pressure of 16 kgs. per sq. cm.

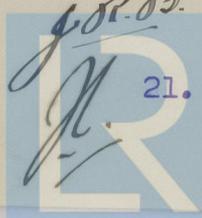

The Surveyors should be informed accordingly, and be requested to forward particulars of the cylinder diameters, length of stroke, diameter of propeller and whether the screw shaft is fitted with a continuous liner or otherwise.

The sizes of the crank, thrust, intermediate and screw shafts should also be furnished, together with a plan of the pumping arrangements.

Return plan (unstamped)
