

RD REPORT on the Proposed S. S. Hill & Co. 128'-9" x 20'-2" x 8'-9"

It is submitted the builders be informed that—
provided a forecastle not less than 6 ft. in height
be fitted and the end sheers being not less than
30" and 17" respectively (these being the sheers scaled
from the plans), the provisional freeboard will
be 1'-0" from statutory deck line $\frac{3}{4}$ " above shell deck
aside, winter $1\frac{1}{2}$ " more.

If it be decided to proceed with the construction of
this vessel the builders should forward the usual
particulars of sheers, erections, tonnage coefficient etc.
for the issue of provisional assignment letters.
