

February 28, 1939.

S.S. "CONISCLIFFE HALL"

Freeboard assigned is minimum international freeboard, plus penalty for low hatch coamings.

It is noted that hatch beams have been reinforced, and that provision has been made for the fitting of lifelines.

If steel doors (at present 1½" wood) are being fitted to forecastle bulkhead, please insert the necessary particulars at back of load line certificates and inform this office accordingly.
