ships the height of the R.Q.D. is to be taken from the level of the top of the amidship beam. In flush-decked vessels the standard mean sheer means the sheer measured at the stem and stern-post. In vessels with forecastles, it means the sheer measured at points distant one-eighth of the length from the stem and stern-post.

line of keel or to the water line. If measured relatively to water line the vessel's draft at survey, and also the usual load draft forward and aft should be reported.
