

S.S. "ASRAR"

I today pointed out to the Owners that the ship is now without a valid Load Line Certificate and liable to be stopped at the next port of call; and that no extension of the Load Line Certificate can be made without Committee approval of a proposal in regard to the Special Survey.

It was emphasised that the case must be submitted to the Committee on Friday morning and that, in view of the age of the ship and the postponements already granted, they would almost certainly refuse to consider any proposal unless it was of a very definite nature and for an extremely short time.

1st June, 1960.
