

## WOKINGHAM COPY.

30th October, 1942.

Dear Sir,

With reference to Greenock Report No.22042 on the refrigerating machinery of the Steamer "EMPIRE PIBROCH", I think it well to inform you that the Committee have today assigned a notation of "Lloyd's RMC 10,42".

I shall, however, be obliged if you will request the Surveyors to state what alternative means there are for circulating the gas condensers, whether the spare gear has been checked on board and whether the exhaust steam has connections to main and auxiliary condensers. Perhaps they will make these matters clear in any future similar cases.

I am, Dear Sir,  
Yours faithfully,

The Secretary,  
GLASGOW.

Clerk to the  
Classification Committee.
