

C O P Y

22nd August, 1958.

AMSTERDAM

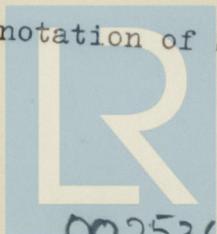

174, 87, 89 - As recommended.

120 "BARKENTINE" - As recommended.

I shall be glad if you will inform the Owners that keel plating on ships drilled and gauged $17\frac{1}{2}$ mm will require to be renewed, and that the keel plating adjacent should at the same time be drilled so that the Surveyors concerned may satisfy themselves that this is in order.

With regard to the deck drillings, it is considered that the starboard strake inboard of the deck stringer plate, frame 105-116, now gauged as 9 port and $8\frac{1}{2}$ starboard should be renewed. The remaining drillings are in order.

157 "ULYSSES" - As recommended, a notation of S.S. Sng. - 11,57 has been assigned.
