

Rhine Land.

about that Glasgow surveyors  
requested to state <sup>for record purposes</sup> the size  
the main boiler safety valves  
which information is not recorded  
in their first entry report No 74651  
and also the total power of engine  
turbine which figure is required  
in the Register Book in case of  
B.C. ships. If the Surveyor  
concerned is not in possession  
the required information then  
his request should be transferred  
to the berth surveyor in whose  
district the owners Messrs Currie  
have their are located & who doubtless  
will supply the missing information
