

special means, in the absence of internal conveyer to assure himself of the thorough efficiency of those parts of each Boiler?

S.S. "RHINELAND" - Machinery Endorsement.

From examination of the first entry and survey reports covering the main engine, exhaust turbine, boilers and electrical equipment, it would seem that the machinery of this ship would meet the requirements of the British Corporation Rules.

It is submitted that the machinery is eligible for British Corporation Class with the notation M.B.S.
