

Messrs. Blair & Co. Ltd., Engine and Boiler No. 1947.

Middlesbrough 1st Entry Report No. 11009.

These engines and boilers have been forwarded to Bilbao and were consigned to Messrs. The Sociedad Espanola de Construccion Naval, to whose order they were originally built.

The Middlesbrough Surveyors state that Messrs. Blair & Co Ltd. have paid 4/5 of the survey fee for the engines and boilers viz: £50..7. 3., and that the consignees are responsible for the balance, viz: the 1st entry fee and 1/5 of the survey fee.

The Surveyors desire to be informed if an account should be rendered by them for the balance in question or whether the same will be rendered from this Office.

It is submitted the Middlesbrough Surveyors be informed that no further action should be taken by them regarding the balance of the survey fees.

A copy of the Middlesbrough 1st Entry Report No. 11009 should be forwarded to the Bilbao Surveyors for their information and they be advised that the engines and boilers were constructed to the order of Messrs. The Sociedad Espanola de Construccion Naval, and were originally intended for their vessel No. 20. Further, that the original arrangement has been departed from, and that they are to be offered for sale. As the engines and boilers have been forwarded to Bilbao, the Surveyors should endeavour to find out their final destination and advise this Office in due course.
