

S.S. "ISONZO".

This vessel has recently been built at Trieste by the Cantiere San Rocco for local Owners.

Construction was commenced in August 1916, but the vessel was not launched until February 1920, and was not completed until May last, (last date of survey 23rd May 1921).

The Surveyor states that the bottom and rudder were examined in dry dock on Tuesday, 3rd May 1921, and were found in perfect condition, and recommends that a date of build of "5,21" might be assigned.

It is submitted that as recommended by the Surveyor, and as approved by the Committee in previous similar cases, the date of build of the vessel be recorded as "MAY 1921".
