TRIESTE

ENCLOSURE.

2nd March 1926.

LLOYD'S REGISTER
Recd. 5 MAR 1926
LONDON

Dear Sir,

I enclose herewith a list of particulars received from the Stabilimento Tecnico Triestino giving the principal dimensions of the new steamer to be constructed by them for the Lloyd Sabauda.

The Builders state that they have copies of the plans of the "CONTE BIANCAMANO" and that the new vessel will be similar but with 2'-0" more breadth which they consider will not materially affect the scantlings, the draft remaining 25'-0" as before.

Apart from the question of beams, pillars and girders I should like to be informed approximately what modification to the scantlings would be required provided the conditions and particulars given by the Builders be adhered to, so that these points may be discussed with them at an early date.

I am, Dear Sir,

Yours faithfully,

The Secretary,

LONDON.
