12th May, 1924.

Dear Dr. Montgomerie,

You have probably observed from the Shipping Papers that the Australian Commonwealth Line Steamer "FORDSDALE" recently arrived in London, and proceeded early on Saturday morning to Glasgow.

She is the largest vessel yet constructed in Australia, and the Deputy Chairman suggests it would be well for a special visit to be paid to her by yourself and Mr. Clarke, with a view to a general report being made.

It is understood that the Steamer is expected to discharge some time towards the end of this week.

Yours faithfully,

J. Montgomerie, Esq., D.Sc.,

GLASGOW.
