Any modification necessary } - .02 C.D.B.  
[Para. 4 (a) to (e)]\*

759 -

Co-efficient as corrected .....

759 -

$$\text{Sheer } \left\{ \begin{array}{l} \text{Stem} \\ \text{at Sternpost} \end{array} \right. \begin{array}{l} 79 \\ 43.2 \end{array} \right\} \frac{122.2}{2} = 61.1 \text{ Mean } \frac{21.41}{36} = 0.59$$

$$\text{Sheer at } \frac{1}{2} \text{ of the length from } \left\{ \begin{array}{l} \text{Stem} \\ \text{Sternpost} \end{array} \right. \begin{array}{l} 44 \\ 23 \end{array} \right\} 67 \div 2 = 33.5 \text{ Mean } 60.91$$

$$\text{Gradual mean Sheer } 60.91 \div 33.5 = 1.8$$

$$\text{Standard mean Sheer [Table, Para. 18] } 39.2 \text{ Correction } 60.91$$

$$\text{Difference } 21.41 \div 4 = -5\%$$

$$\$ \text{ If limited as Para. 18 (f) } \checkmark \quad 5.35 \quad -5\%$$

$$\text{Rise in Sheer } \left\{ \begin{array}{l} \text{At front of bridge house} \\ \text{from amidships} \end{array} \right. \quad \left\{ \begin{array}{l} \text{At after end of forecastle} \end{array} \right. \checkmark$$

$$\text{Fall in Sheer } \left\{ \begin{array}{l} \text{Para. 18 (d)} \end{array} \right. \quad \div 2 = \quad \checkmark$$

Length uncovered ..... Correction

## ALLOWANCE FOR DECK ERECTIONS :—

Freeboard, Table C ..... 1.5

Correction for Length, if required (Para. 12, 13, and 14) ..... 6

Freeboard by Table A, corrected for sheer, and for length, if required (Para. 12, 13, and 14) } 3 - 5 3/4

Difference ..... 2.0 3/4

Percentage as below ..... 56.4 3/4

14.11

Correction for R. Q. Dk. if engine and boiler openings not covered by bridge house (Para. 11) } ✓

1.2

Allowance for Deck Erections ..... 1.2

Length. Length allowed. Height.

Forecastle ..... 33.87 - 33.87 -

Bridge House ..... 165.00 - 165.00 -

+ Raised Qr. Dk. ..... 26.63 - 26.63 -

Poop ..... 26.63 - 225.50 -

Total ..... 295.00 = 764.3

Corresponding percentage } 56.4 3/4

FREEBOARD recommended amidships from centre of Disc to top of Statutory Deck Line, Wood (Steel) Deck :—

Fresh Water Line above centre of Disc

Indian Summer Line " " "

Winter Line below " "

Winter North Atlantic Line " "

\* If the frames, skin planking, or ceiling are of unusual thickness the breadth of vessel to inside of ceiling should be reported if possible.

† In vessels obtaining an allowance for deck erections under Para. 11 where the sheer drops abeam amidships the height of the R.Q.D. is to be taken from the level of the top of the amidships beam.

§ In flush-decked vessels the total standard mean sheer means the sheer measured at the stem and stern-post. In vessels having poops and forecastles, it means the sheer measured at points distant one-eighth of the vessel's length from stem and stern-post.

2m.10.23. T.

FW =  $\frac{526.3}{40 \times 24.2} = 5.02$

State dimensions of freeing port area on back of this form.

The Surveyor should state whether the fall in sheer as reported is measured relatively to the straight line of keel or to the water line. If measured relatively to water line the vessel's draft at time of survey, and also the usual dead draft forward and aft should be reported.

Do all the frames extend to the top height in the Poop? Yes ✓ Raised Quarter Deck? ✓ Bridge House? Yes ✓ Forecastle? Yes ✓  
 To what height do the Reverse Frames extend? ✓  
 Has the Poop or Raised Quarter Deck an efficient Iron Bulkhead at the fore end? Yes ✓  
 Give particulars of the means for closing the openings in Bulkhead. Storm boards full height in riveted channels  
 Is the Poop or Raised Quarter Deck connected with the Bridge House? No ✓ Has the Bridge House an efficient Bulkhead at the fore end? Yes ✓  
 Give particulars of the means for closing the openings in Bulkhead. Stinged Steel doors  
 What is the thickness of the Bridge Front plating? .40 and Coaming plate? plated vertically  
 Give scantlings and spacing of the stiffeners. B.A. 8x3x35' Spaced 30' apart.  
 Are bracket plates fitted at each end of the stiffeners? Lugs ✓ Are hor'l. brackets fitted connecting Bridge Bulk'd. with Bulwarks? Yes ✓  
 Has the Bridge House an efficient Iron Bulkhead at the after end? Yes ✓  
 How are the openings closed? Storm boards full height in riveted channels.  
 Is the Forecastle at least as high as the main or top-gallant rail? Yes ✓ Has the Forecastle an efficient Iron or Wood Bulk'd. at after end? Yes ✓  
 Are the Engine and Boiler openings covered by a Bridge, Poop, Raised Quarter Deck, or enclosed by a Strong Iron or Steel Deckhouse? By a bridge  
 If the openings are not so protected are the exposed parts of the casings efficiently constructed?  
 Give thickness of plating; scantlings and spacing of stiffeners  
 What is the height of the exposed Casings? 7.6 Are suitable means provided for closing all openings in them in bad weather? Yes ✓  
 Are the Weather Deck Hatchways efficiently constructed and at least equal to the requirements of Section 28 of the Rules for 1904-5? Give particulars below:—

Position and Size.	No. 1. 25.0 x 18.0	No. 2. 30.0 x 18.0	No. 3. 30.0 x 18.0	No. 4. 25.0 x 18.0
Item.	Ship.	Rule.	Ship.	Rule.
