

"CAMILLO"

Captain Pitt of the Owners telephoned this morning and stated that they contemplate sending this ship to a Mediterranean port where she will be used as a hulk, and enquired as to the nature of the surveys required before the ship leaves.

After discussion with Mr. Turner, Captain Pitt was informed that in addition to the holding of the Donkey Boiler Survey, and Load Line Survey, she should require a General Examination (Drydocking) to be left to the Surveyor's discretion, for postponement of the Special Survey.

*Special attention to be given to conditions of class.*

Captain Pitt agreed to put his request in writing, and asked that a letter be addressed to the Owners confirming our requirements.
