

25th May, 1962.

DON.

134 "LUNE DEEP" - As recommended, except that assignment of the station SS (Dr) 4.62 has been assigned pending completion of the next CS cycle.

209 "PALERMO" - As recommended, except that assignment of the station MBS 2.62 has been deferred until the port boiler end plate way of bottom longitudinal stays has been specially examined and it with as necessary by the end of next month.

230 "DOMINION MONARCH" - As recommended, except that as the alock repairs to the aft Weir's feed pump water end have proved satisfactory in service since February, 1959 this item has been noted as a condition of class. A suitable entry has however been entered in the SRL Appendix.

7100 "DRACONE NO. F.5" This container has today been classed as flexible towable container (oil) "Restricted coasting service" subject to annual examination with the notation "Experimental".
